Ogden International

Period 7

My designer is Frank Lloyd Wright. He is from Richland Center, Wisconsin. Frank Lloyd Wright is famous for introducing new and modern architecture with organic designs to the early 20th century. He was influenced by Louis Sullivan who was considered the *father of Skyscrapers*. He was also influenced by his mother who gave him building blocks as a kid which helped him want to learn and know more about architecture. Frank Lloyd Wright has introduced many new styles that people use today. He has changed the world around architecture because his modern architecture includes organic colors, simple geometric shapes, the integration of buildings with its natural surroundings, strong horizontal lines, and hidden entries. I chose Frank Lloyd Wright because I thought that his architecture and ways of doing it have changed the whole way around architecture. Frank Lloyd Wright also began his own school called Taliesin, School of Architecture in Scottsdale, Arizona. Even though many people think Lincoln Logs were named after Abraham Lincoln, one of Frank Lloyd Wright's kids made Lincoln Logs. He named them this because Frank Lloyd Wright's original middle name was Frank Lincoln Wright, but after his parents divorce they changed it.
